

BETTER THAN AVERAGE CROP IS PREDICTED

Wheat Mostly Bladed Out: Oats and Barley Grow Rapidly

WINNIPEG, Man., July 19.—Twenty four days is making a crop difference, reports the Canadian Pacific agricultural department. The general outlook at present is quite favorable and while a few districts report adversely, prospects as a whole are quite promising and better than average for the past ten years. Weather for the most part during the week has been warm with rain in many sections. Wheat is mostly bladed out and oats and barley are coming along rapidly.

The crop is expected to be an exceptional one to handle on account of the general abundance of straw, which condition may also render it less likely to rot during storage.

High low struck crops in a number of districts, but the average is good. The situation in Alberta, with a few exceptions, is encouraging. Rain falls have been experienced along the coast, Saskatchewan, and some of the prairie.

Hardy conditions with scattered showers on October 15th, and from 15th to 17th, in the south. On the 18th, a heavy rain fell, with the exception of southern portions where many districts report moisture is needed more or less.

The wheat and barley crops are well advanced and many more rain, but the crops are well advanced. The oats and barley crops are well advanced. The wheat and barley crops are well advanced.

The Edmonton Bureau and many, was welcomed by Nelson. The best of the past week did not cause any depression. The crop outlook is good, though generally speaking a liberal rainfall will result in a good grain.

The prospects are that more grain will be harvested from this territory than ever before. A great deal of new breaking has been accomplished with work well done.

CHINESE NATIONAL LEAGUE ENTERTAINS

Artistic Mayor Gibbs on Sunday evening was a guest of the Chinese National League, which met at the club to celebrate the third of the league. Speeches were made and the evening was a most successful one.

The Chinese National League, which met at the club to celebrate the third of the league. Speeches were made and the evening was a most successful one.

KEEP THIS ANNOUNCEMENT FOR FUTURE REFERENCE

Share in Alberta's New Prosperity!

"PEP" is the appropriate name given to the gasoline product of Alberta Refineries Limited, produced from the crude oil of the Wainwright field.

"PEP" has justified its name as a lively, volatile, anti-knock gasoline which motorists insist upon after once having used it. Today the present "PEP" plant is inadequate for the demand.

Why a Cracking Plant Is Necessary

Prof. Gustav Egloff of the Universal Oil Products Company Research Laboratories, in a lecture before the American Institute of Mining and Metallurgical Engineers, spoke emphatically upon the wonderful economy and value of the "Cracking Plant" in the production of high grade anti-knock gasoline from crude oil.

He claimed, and showed by tests and actual production in many fields, that by the Dubbs process, from 50 to 70 per cent gasoline is extracted from the crude and showed that from the Kevin Sunburst crude this percentage is always obtainable. The heavier crude from the Smack-over field is mentioned as showing "the wonderful potentialities of this process."

"One of the wonder oil fields of the United States is the Smack-over Arkansas, which is still producing 180,000 barrels per day, of which 163,000 barrels (December 31, 1925), is heavy oil. This oil, of asphaltic character, is not very satisfactory as a fuel oil due to its emulsified water, high sulphur contents and other properties.

"The general inquiry when a new Smack-over well was brought in 'What will they do with it after they get it?'

"One leading oil man stated that Smack-over 'Heavy crude' had everything in it it should not have for a refinery. Yet, despite these pessimistic statements, Smack-over heavy oil is being commercially cracked into over 50% gasoline. Smack-over heavy crude oil production of 163,000 barrels daily can be converted into 81,500 barrels of gasoline per day by the cracking process."

The results achieved from the Kevin Sunburst Fuel Oil preages those which will be accomplished by the Cracking Plant in treating the crude oil from the Wainwright field, as the chemical composition and gravity of the oils are almost identical.

"The Dubbs Process is so flexible that it converts any type of oil without change of principles or equipment into gasoline. Commercial plants are in operation or under course of construction in various parts of the world, such as Japan, Borneo, Java, and Dutch West Indies, Australia, Rumania, and many parts of the United States."

THE next western wave of prosperity—and it is already rolling—will be that arising from the immense oil fields of Alberta. With the world anxiously alert for news of this valuable natural resource, so essential to modern industry, the spotlight is now turned upon this province, awaiting the part she is to play in the great production of petroleum.

This thrilling drama of modern commerce and industry will hold no more dramatic act than the development of Alberta's oil fields, which, geologists say, are even now, potentially the greatest in the world.

Already the most spectacular oil well in existence, indeed, the most wonderful in the history of petroleum, is giving up wealth at the rate of two million dollars a year. Scientists have proclaimed the province as the future El Dorado, to draw men from the four corners of the earth to its wells of liquid gold.

And at our very door here at Edmonton is the Wainwright field, already working out its destiny as a prolific part of this wide petroleum area that is to make Alberta one of the most prosperous of all the provinces in the Dominion.

THE enormous profits made in the development of petroleum have been secured by the manufacturing end of the industry, according to the information that developed during the dissolving of the Standard oil trust, and it is to foreign refineries and production companies that Canada pays \$120,000,000 a year for gasoline.

Alberta alone, with billions of barrels of the precious liquid under the rocks in her yard, pays millions a year to United States and foreign countries for gasoline and petroleum products.

In this situation the necessity for the development of the oil resources of the province and the refining of the product becomes painfully obvious.

The development bids fair to be carried on in the immediate future and it must be clear that the profits to accrue from the refining of the crude oil produced will go abroad unless adequate refineries are established here.

The Alberta Refineries Ltd., the pioneers in this movement to keep the petroleum profits at home, has already established a plant and perfected a gasoline product—"Pep," which has proved a highly superior motor fuel. So much so that the demand far exceeds the output of the 1000-barrel-a-day plant. A second plant of 500-barrels-a-day capacity is projected, and the success of this company is already assured.

Refineries Distributors Ltd. is a company organized to market and distribute the "Pep" products. The program of the company is to build and maintain "Pep" Service Stations, extending these indefinitely as the production is increased—for production is the only problem now.

To assist in this production of the "Pep" products, the Refineries Distributors Ltd. have themselves come to the refining end of the business, and will erect a "Cracking Plant" by which 50 to 70 per cent of gasoline will be extracted from the Wainwright crude oil. This is three to five times more than it is possible to get by the ordinary refining process.

The success of this company is a foregone conclusion; the field is fallow, and with diligence in the sowing of the seed, the harvest must be bountiful.

The investment in this pioneer and basic industry of the province gives every promise of proving extraordinarily profitable.

Early day gold seekers overlooked the rich sulphide areas which were almost pure gold, but which did not glitter.

Modern Science touched them with her magic hand. Millions of dollars were taken from the rocks of goldfield, thrown aside by the placer miners looking for seeds of yellow gold. . . Think this over!

"Petroleum is one of our most valuable natural resources. . . The refining of petroleum must become our foremost industry."

"When the Standard Oil Trust was dissolved, it developed that 80% of the profit in petroleum was made by the refining end."

Refineries Distributors Limited

208 McLEOD BUILDING, EDMONTON, ALBERTA

Capitalization ~ \$1,000,000

90,000 Shares, Preferred, \$10 Par

100,000 " Common, \$1 "

Present Offering: The balance of a Block of 30,000 Preferred Shares at Par each Preferred Share carrying a Bonus of One Common Share.

DIRECTORS:

JOHN L. MERCER, Edmonton, Alberta, President.

H. A. STEWART, Vancouver B.C.,
Vice-President and Managing Director.
M. C. HAMMOND, Edmonton, Alberta.

J. C. C. BRENNER, Clover Bar, Alberta.
ROBERT McDONALD, Edmonton, Alberta.
W. A. TRIMBLE, Edmonton, Alberta, Secretary-Treasurer.

REFINERIES Distributors Ltd. was organized with a Dominion Charter, capitalized at \$1,000,000, divided into 90,000 8% Preference Shares with a par value of \$10.00 each; and 100,000 Common Shares with a par value of \$1.00 each. Paid up capital is \$200,000.

The company was organized to market the "PEP" products of the Albert Refineries Ltd., and also to produce gasoline and other products from crude petroleum by means of a cracking plant, this plant employing the Dubbs process, a great scientific and economic advance over the ordinary refining plant, extracting from 3 to 5 times as much gasoline from the crude oil.

The present issue, for the purpose of carrying on the immediate program of the company, is 30,000 Preference Shares, of which 10,000 shares have already been sold. The Preference Shares are offered in units of 1 at par \$10.00, and each of these Preference shares carries a bonus of 1 Common Share.

The initial program of the company is to erect and maintain a number of Service Stations throughout the Province for the marketing of "PEP" gasoline and petroleum products, a profit of 3c per gallon clear of freight being available from this source alone at the present market prices.

Also to erect a "Cracking Plant at a cost of \$150,000. This will have a capacity of 1,000 bbls. of crude oil and will produce from this a minimum of 500 bbls. of anti-

knock gasoline every twenty-four hours. At 35 gallons to the barrel, this shows a total output of 17,500 gallons a day.

Apart from the individual profit of the cracking plant unit working at capacity, the output marketed through the service stations shows a distributing profit of \$525.00 per day net. This alone will show a handsome dividend on a \$1,000,000.00 capitalization in addition to the 8% per annum on the preferred shares.

Detailed figures will show this enterprise to be one of the very highest potentialities for profit. We shall be pleased to send a digest of the situation, based upon actual conditions, to the earnest investor.

In the meantime the soundness of the proposition will appeal to the investor who realizes that these pioneer enterprises in industry based directly upon natural resources, reap the rich reward.

GASOLINE ALLEY

The Only Bachelor Left

NEIGHBORS' WIVES

ERNEST LYNN, author of THE YELLOW STUB

BEGIN HERE TODAY JOHN and FAY MILLERIN buy a home when their baby girl is born and the advertising agency in which John is partner gets a new lease on a new contract. Among their acquaintances are:

NOEL and VERA BOYD, whose marriage is happy.

PAT and MARIA FORTES, who have three children and whose domestic life is unhappy because of FAY's rising stardom. Previous chapters told how:

John was discharged on account of his illness, of whom Pat Fortes hints that she is having trouble with her husband.

FAY took JIMMY the baby, to Memphis to visit her parents, and during her absence John "ran around," a good word mostly with Pat Fortes. When FAY returned, John had realized some of his actions and sharp reprimands followed, one of which drove him out on a tear. FAY, learning he had been out with other women, threatened to leave him if he was not reformed.

FAY learned of it and leaves him. John claims the house and takes an apartment and her next night comes home to find a letter from FAY, telling of a quarrel with her husband, NOEL. John, who expects John of having come between them, while John is talking with her the door opens and Howard comes in.

NOW GO ON WITH THE STORY

JOHN could do nothing but stare. And within him was the knowledge of the folly of words. Terror had leaped to John's eyes.

As for Howard, the man's face was quite terrible to behold. The thin, straight line of his mouth was even thinner and straighter because of the set teeth. The muscles of his jaw stood out like great knots and his nose narrowed in anger. Howard like FAY, of the two, John, despite the false pretense he was in, was the more of a coward. He had been against the wall and now there a breathless expectancy.

John was thinking, "What have I done? I don't want to make any apologies."

Howard, closing the door behind him and looking back again at John, said, "You look like a man who has just been told that he is a fool."

John, who had been staring at him, said, "I'm a little surprised. I would have thought that was where I'd be."

Howard, then, said, "You are a little surprised. I would have thought that was where I'd be."

John, then, said, "You are a little surprised. I would have thought that was where I'd be."

Howard, then, said, "You are a little surprised. I would have thought that was where I'd be."

John, then, said, "You are a little surprised. I would have thought that was where I'd be."

Howard, then, said, "You are a little surprised. I would have thought that was where I'd be."

PINNELL STARS WHEN NATIONALS ARE DEFEATED

Kenny Blatchford Wins Kicking Contest—Final Game Today

VANCOUVER, July 18—In a see-saw game which did not provide much excitement for the spectators, Canadian Outrigger, the Vancouver Island team representing British Columbia in the Comnaught Cup playoffs, defeated Edmonton C.N.R. Alberta champions, by a score of 1 to 1, late, Saturday afternoon. The second and final game of the series in which the total goals scored was
